

Hi there, I'm Muhammed Abdulquddus! 🙋

Welcome to my GitHub profile! I'm a 400-level Urban and Regional Planning student at the Federal University of Technology, Minna, in Nigeria. I'm passionate about technology and love exploring the intersection between urban planning and software development.

### 🚀 About Me

- 🎓 Student: Currently pursuing a degree in Urban and Regional Planning.
- 🌍 Location: Abuja, Nigeria.
- 💻 Learning: Actively learning Flutter for mobile app development and Python for backend development.
- 🎯 Goals: I aim to leverage technology to create innovative solutions that address urban challenges and improve city living.

### 🔧 Skills & Tools

- Programming Languages:
  - Python (Backend Development)
  - Dart (Flutter Development)
- Frameworks & Libraries:
  - Flutter (Mobile App Development)
- Tools:
  - VS Code
  - Android Studio
  - Git & GitHub
  - Termux

### 📖 Current Projects

- Learning Flutter: I'm working on mastering Flutter to build cross-platform mobile applications.
- Exploring Backend Development: Diving deep into Python for backend development, aiming to build robust and scalable web applications.

### 🌱 I'm currently learning

- Advanced Flutter techniques
- Backend development with Python

### 🎯 Hobbies

- Reading tech blogs and books
- Solving puzzles
- Learning and creating new things

### 📧 How to reach me

- Email: [quddumuhammed.a@gmail.com](mailto:quddumuhammed.a@gmail.com)
